

Rating Action: Moody's downgrades Deutsche Hypo's Public-Sector Pfandbriefe, confirms Mortgage Pfandbriefe

Global Credit Research - 07 Jul 2017

London, 07 July 2017 -- Moody's Investors Service has today downgraded to Aa2 from Aa1 (on review for downgrade) the public-sector Pfandbriefe issued by Deutsche Hypothekbank (Actien-Gesellschaft) (Deutsche Hypo; CR assessment Baa2(cr)). At the same time we confirmed the Aa1 ratings assigned to its mortgage Pfandbriefe.

This rating action concludes the review for downgrade of both Pfandbriefe initiated on 19 April 2017.

RATINGS RATIONALE

Today's rating action is prompted by the downgrade of the issuer's counterparty risk (CR) assessment. For further details, see "Moody's downgrades NORD/LB's and its subsidiaries' deposits to Baa2 and senior unsecured ratings to Baa3, outlook negative", published on 30 June 2017.

Moody's has downgraded the public sector Pfandbriefe to Aa2, because looking forward, it does not expect over-collateralisation (OC) in excess of the 2% (on a stressed NPV basis) required by the German Pfandbrief Act, which is consistent with a Aa2 rating.

Moody's has confirmed the Aa1 rating assigned to the mortgage Pfandbriefe because looking forward, it expects that OC will be maintained at a level consistent with a Aa1 rating.

KEY RATING ASSUMPTIONS/FACTORS

Moody's determines covered bond ratings using a two-step process: an expected loss analysis and a TPI framework analysis.

EXPECTED LOSS: Moody's uses its Covered Bond Model (COBOL) to determine a rating based on the expected loss on the bond. COBOL determines expected loss as (1) a function of the probability that the issuer will cease making payments under the covered bonds (a CB anchor); and (2) the stressed losses on the cover pool assets should the issuer cease making payments under the covered bonds (i.e., a CB anchor event).

The CB anchor for both programmes is CR assessment plus one notch. The CR assessment reflects an issuer's ability to avoid defaulting on certain senior bank operating obligations and contractual commitments, including covered bonds. Moody's may use a CB anchor of CR assessment plus one notch in the European Union or otherwise where an operational resolution regime is particularly likely to ensure continuity of covered bond payments.

--- Deutsche Hypo Mortgage Pfandbriefe ---

The cover pool losses for this programme are 17.5%. This is an estimate of the losses Moody's currently models following a CB anchor event. Moody's splits cover pool losses between market risk of 11.3% and collateral risk of 6.2%. Market risk measures losses stemming from refinancing risk and risks related to interest-rate and currency mismatches (these losses may also include certain legal risks). Collateral risk measures losses resulting directly from cover pool assets' credit quality. Moody's derives collateral risk from the collateral score, which for this programme is currently 9.3%.

The over-collateralisation in the cover pool is 20.0%, of which Deutsche Hypo provides 2.0% on a "committed" basis. The minimum OC level consistent with the Aa1 rating is 15.5%, of which the issuer should provide 0.0% in a "committed" form (all numbers on present value basis). These numbers show that Moody's is relying on "uncommitted" OC in its expected loss analysis.

All numbers in this section are based on the most recent Performance Overview (based on data as per 31 December 2016), with the exception of the OC level consistent with the current rating.

--- Deutsche Hypo Public-Sector Pfandbriefe ---

The cover pool losses for this programme are 12.0%. This is an estimate of the losses Moody's currently models following a CB anchor event. Moody's splits cover pool losses between market risk of 9.0% and collateral risk of 3.1%. Market risk measures losses stemming from refinancing risk and risks related to interest-rate and currency mismatches (these losses may also include certain legal risks). Collateral risk measures losses resulting directly from cover pool assets' credit quality. Moody's derives collateral risk from the collateral score, which for this programme is currently 6.1%.

The over-collateralisation in the cover pool is 14.5%, of which Deutsche Hypo provides 2.0% on a "committed" basis. The minimum OC level consistent with the Aa2 rating is 2.0%, of which the issuer should provide 0.0% in a "committed" form (all numbers on present value basis). These numbers show that Moody's is not relying on "uncommitted" OC in its expected loss analysis.

All numbers in this section are based on the most recent Performance Overview (based on data as per 31 December 2016), with the exception of the OC level consistent with the current rating.

For further details on cover pool losses, collateral risk, market risk, collateral score and TPI Leeway across covered bond programmes rated by Moody's please refer to "Moody's Global Covered Bonds Monitoring Overview", published quarterly.

TPI FRAMEWORK: Moody's assigns a "timely payment indicator" (TPI), which measures the likelihood of timely payments to covered bondholders following a CB anchor event. The TPI framework limits the covered bond rating to a certain number of notches above the CB anchor.

The mortgage and public-sector Pfandbriefe have a TPI of High.

Factors that would lead to an upgrade or downgrade of the ratings:

The CB anchor is the main determinant of a covered bond programme's rating robustness. A change in the level of the CB anchor could lead to an upgrade or downgrade of the covered bonds. The TPI Leeway measures the number of notches by which Moody's might lower the CB anchor before the rating agency downgrades the covered bonds because of TPI framework constraints.

Based on the current TPI of "High", the TPI Leeway for Deutsche Hypo's mortgage Pfandbriefe is one notch. This implies that Moody's might downgrade the covered bonds because of a TPI cap if it lowers the CB anchor by two notches, all other variables being equal.

Based on the current TPI of "High", the TPI Leeway for Deutsche Hypo's public-sector Pfandbriefe is two notches. This implies that Moody's might downgrade the covered bonds because of a TPI cap if it lowers the CB anchor by two notches, all other variables being equal.

A multiple-notch downgrade of the covered bonds might occur in certain circumstances, such as (1) a country ceiling or sovereign downgrade capping a covered bond rating or negatively affecting the CB Anchor and the TPI; (2) a multiple-notch downgrade of the CB Anchor; or (3) a material reduction of the value of the cover pool.

RATING METHODOLOGY

The principal methodology used in these ratings was "Moody's Approach to Rating Covered Bonds" published in December 2016. Please see the Rating Methodologies page on www.moody.com for a copy of this methodology.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions of the disclosure form.

Moody's did not use any stress scenario simulations in its analysis.

For ratings issued on a program, series or category/class of debt, this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support

provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

For any affected securities or rated entities receiving direct credit support from the primary entity(ies) of this credit rating action, and whose ratings may change as a result of this credit rating action, the associated regulatory disclosures will be those of the guarantor entity. Exceptions to this approach exist for the following disclosures, if applicable to jurisdiction: Ancillary Services, Disclosure to rated entity, Disclosure from rated entity.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Please see www.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on www.moodys.com for additional regulatory disclosures for each credit rating.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation

("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for appraisal and rating services rendered by it fees ranging from \$1,500 to approximately \$2,500,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
